

AMERICA'S DIRTY LITTLE SECRET

Author; Robert April 1, 2006

As the flag-draped might of America's Military patrols the world in search of tyrants and dictators who trample on the most basic of human rights, those same "unalienable" rights that are so artistically enumerated in America's profound and majestic "Bill Of Rights," there is a dirty little secret terrorizing the American People that no one dares talk about it... for fear of reprisal is so great and so ingrained in their collective psyche... it has become a subject no-one dare approach.

The media will not talk about it. In fact, out of fear of retribution and retaliation, the media have become outright proponents, puppets, and cheerleaders, all chanting in unison at predictable times each year, of the horrible negative consequences and unthinkable pain and penalties that will befall one for not going along with, and for daring to question, this dirty home-grown operation that grows and thrives on oppression and fear.

This cabal's reign of terror is so effective that entire families have been ruined and turned to fine particles of dust, suicides are common when the might of this operation is directed at one, and heart attacks and other illnesses have been attributed to the effects of this gangs' unspeakable and unrelenting reign of terror. Numerous studies have shown that a person's blood pressure will spike noticeably upwards at the mere mention of this gangster ridden mafia-like operations' name.

Friends and family become visibly uncomfortable when the subject comes up. People will quickly abandon and walk away from their "former" friends and neighbors if they even remotely suspect someone has become involved with or, worst of all, may be receiving the negative attention of this gangster ridden cadre of merciless goons.

Without any due process of law and with the implied permission of the highly-esteemed world renowned American legal system, families have been thrown out onto

the street after having their homes stolen. If the home is not outright stolen, it is broken into and ransacked and burgled from the front and first square inch to the last.

Without any due process of law and with the implied consent and permission of the highly-esteemed and world renowned American legal system, bank accounts are regularly cleaned out and robbed, automobiles are hijacked on the street or right out of people's driveways. Workers paychecks are diminished to worthless pittances of what they had been before. And everyone looks the other way and pretends it's not happening.

There is no recourse in the court system, for the judges themselves are in mortal fear of this unspoken but powerful enemy of the people.

Those who dare to speak out are quickly taken away and locked up in prisons, not to be seen or heard from for years. And all this is accomplished with the court system encouraging and sanctioning this bunch of predators, for as I have mentioned, the judges also live in fear that they might be next should they actually read the laws and statutes that prove one's innocence and actually point in favor of the "accused" and against the oppressors.

Evidence of this gang of thugs' thievery and lawlessness, and of statutes and regulations pointing to their guilt are regularly overlooked and systematically ignored by this impotent judiciary, for it has been suggested (and documented, but we won't go there) that these judges receive bonuses for deciding in favor of and for becoming accomplices in this wave of terror sweeping across the United States of America. Huge payments in cash have been admitted to by some in Congress.

Who are these terrorists and why are they allowed to flourish and thrive in the "land of the free?" I'm so scared I can't tell you.

Relax... I'm kidding. No such beast would ever be allowed here!

Happy April Fool's Day (on the 15th!)
